DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 28 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 25 states that the preprocessing is performed in the first processor and the preprocessed signal is fed into the second processor. Claim 28 then states that a portion of the preprocessing is performed in the second processor. It would appear that claim 25 should state that "at least a portion" of the preprocessing is performed in the first processor to avoid the confusion.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 5-10,13-17, 20-27 and 29 are rejected under 35 U.S.C. 102(b) as being unpatentable by Schulman et al. USPN 5,531,774. See previous office action mailed 9-7-2005 for detailed explanation. With respect to claim 27, the transmitting and receiving circuits provide the matching compatibility.

Application/Control Number: 10/805,016 Page 3

Art Unit: 3766

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 4, 11 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schulman et al. USPN 5,531,774 in view of Karunasiri USPN 6,195,585. See previous office action mailed 9-7-2005 for detailed explanation.

Claims 12 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schulman et al. USPN 5,531,774 in view of Hahn et al. USPN 6,212,431. See previous office action mailed 9-7-2005 for detailed explanation.

Claim 30 is rejected under 35 U.S.C. 103(a) as being unpatentable over Schulman et al. USPN 5,531,774 in view of Lindemann et al. USPN 5,479,522. See previous office action mailed 9-7-2005 for detailed explanation.

Claim 31 is rejected under 35 U.S.C. 103(a) as being unpatentable over Schulman et al. US 5,531,774. See previous office action mailed 9-7-2005 for detailed explanation.

Response to Arguments

Applicant's arguments filed 2-7-2006 have been fully considered but they are not persuasive. Applicant's arguments are rely upon intended use statements rather than

Art Unit: 3766

structural differences to attempt to define over Schulman et al. Cochlear implants are a form of hearing aid and thus the first processor in Schulman is a hearing aid processor.
